

HealthPathways

About our service

The Hospital HealthPathways team is part of the bigger HealthPathways team (Community HealthPathways for GPs, Allied HealthWays for Allied Health and Health Info for the public) and consists of a number of hospital doctors who work as 'clinical editors' (writing pathways with hospital specialists), coordinators and a programme manager. The team works closely with the technical writers at Streamliners (who provide the technical expertise).

Medical Kaimahi (Staff) in our Service/SMO support.

The HHP team are multidisciplinary, but the work of clinical editors is supervised by the Senior Clinical Editor (Professor Mike Ardagh) and the programme manager (Mary McLeod). A number of hospital doctors are working as Clinical Editors, and there is regular interaction among all the Clinical Editors to offer support and to exchange ideas.
